Abstract

The method for setting the sales price easily with the push button includes the steps of: a) initializing the I/O of a CPU by applying the constant voltage; b) displaying the sales management data or dispensing the corresponding small change if the D of the inventory switch is on; c) transferring to the setting mode of the sales price and displaying the preset prices according to each inventory switch state to set the new price, if the D+ off of the inventory switch is on; and d) turning the D+ off of the inventory switch off and returning to next step after setting and storing new prices.
